The software provides an ultra-fast video player, which can encode and download video streams from many video download sites, including YouTube, Vimeo and The Pirate Bay. The software also lets you record and manage your favorite videos from a USB stick, DVD disc, or even a local hard disk. HD Video Fone Description: Webcam Recorder Pro can be used to record any kind of video chat on your computer and then to find out the image with its higher resolution. It is used to store, print, scan and share your webcam images. The program has a simple interface, supports popular video chat formats, and is compatible with all of the most popular web browsers. This software can be used to download the recorded video into MPEG and QuickTime formats. It can also work with audio files which have been recorded from any audio input device. Thanks to its precision timing function, Webcam Recorder Pro is able to record the timings of both audio and video clips in real time. You can easily set up video recording modes and audio levels, in addition to the recording duration and date and time. Webcam Recorder Pro can store the recordings on a local or networked drive. It has a very high level of video quality and reliability, and can detect and correct any problems that might arise. With the help of Encoder Pro, you can easily record a video stream that can be later on edited or imported to online video sites or streamed live to other users. The program's interface is clean and intuitive, and it is very easy to master. Encoder Pro is compatible with most video-streaming sites and has advanced video encoding options, including high quality, background noise reduction, compression and filtering; besides, it supports a wide range of audio formats for audio input and output. Encoder Pro is a lightweight utility, so it requires limited system resources. The application has no control panels, and, therefore, it does not conflict with other open programs and user interfaces. Remote Program Uninstaller The file contains a script that will run on the remote PC and uninstall or remove the target program. This would be a time consuming and tedious process if left to your own, but with the help of this software, you can uninstall programs on remote machines very quickly and easily, saving you a lot of time. How it Works: The software loads some PowerShell commands that installs a remote control application that is then invoked to uninstall the application remotely on a targeted Windows PC. Here is a step by step guide on how to use this software: Step 1: Open the software and log in using the credentials. Step 2: Input the details of the remote Windows PC you want to uninstall the software on. Step 3: Select the programs you want to uninstall on the remote machine. Step 4: Select the file to be used for remote control (Default is D:\tvp.ps1) Step 5: Click OK when prompted. Step 6: Once you click OK, the setup will run and install the application on the remote machine. Step 7: Press the Uninstall button to run the script. Step 8: You will be prompted for user credentials for remote control. Step 9: Once the script completes, you can log in and check what programs have been removed from the remote machine. Step 10: You can click on the menu to get more details for each program removed. Step 11: Click OK when you are ready to exit the software. Conclusion: Total Video Player is a powerful program that is lightweight in size and runs fast on your system. You can use it to quickly remove programs from remote machines.
